

RETRACTABLE ENCLOSURE SYSTEMS  
PAIR WITH DUST COLLECTORS

# Your Industrial Clean Air Solutions

## RETRACTABLE ENCLOSURES DUROROOM™

- Modular, portable and retractable
- The enclosure retracts to 20% of the extended length, allowing for maximum use of existing floor space, accommodating oversized workpieces, and allowing for full use of overhead crane
- Code compliant galvanized welded steel frame
- Ease of set-up, fully customizable and engineered in a variety of configurations
- Designed for use in coating, painting, grinding, sanding, and adhesive bonding process; can be used as prep stations, paint booths, finishing stations, spray booths, etc.

## VERTICAL CARTRIDGE BOOTH DUST COLLECTOR

- Louvered intake side hinged door
- Drawer module
- Cam lock and slide support for cartridges
- 12 gauge construction
- VFD controls and In-Line silencer (optional)
- Low RPM Direct Drive Top mounted BI Wheel Blower
- Compressed air tank for reverse pulse cleaning with Venturi
- Self cleaning relieves filter pressure and maintains even flow filter throughout unit life
- Secondary filters available (optional)
- Nanofiber or SB Polyester main cartridge filter available (optional)
- Energy savings due to filtration and recirculation vs evacuation (Green)
- NFPA code compliant
- Fully welded cabinets (no issues with bolting and re-tightening, caulking or gasket)
- Programmable pulse sequencer – 120V-1-60

Improves Air Quality  
Maximizes Space And Flexibility  
Increases Productivity

# RECENT PROJECTS:

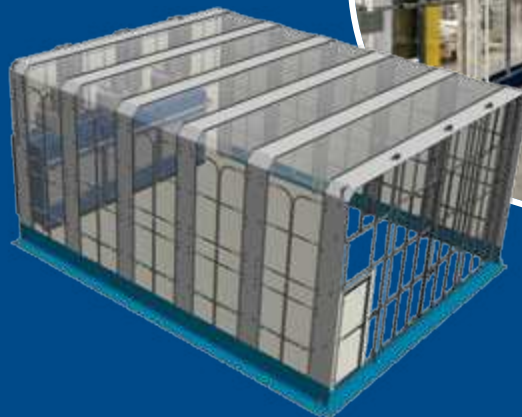

## A LARGE AEROSPACE CUSTOMER

- Used in the defense R&D model shop department
- Enclosure – 15'H x 25'W x 30'L
- Dust collectors – 3 x DCCH 12, 12,500CFM with drawers

## A LARGE POWER AND WATER METAL FABRICATOR

- Used in R&D facility
- Enclosure – 10'H x 20'W x 80'L
- Dust collectors – 2 x DCCH 12, 10,000CFM with drawers
